Barcelona Area, Spain

SUMMARY

I am a vocational and dedicated professional in IT with extensive experience in software development. I have more than 15 years of working experience with Java technologies. I like to learn new technologies in this area and others, as well as sharing knowledge with the team members I work with. I'm especially interested in working within teams of people from different countries and cultures.

EXPERIENCE

Senior Software Developer

Haufe

02/2017 - Ongoing Barcelona

As part of the Haufe-Umantis branch:

- I'm working as a backend developer creating a HR application in an international culture.
- I'm working developing REST apis in a microservices architecture.
- We use technologies like Java 8, Spring boot, AWS, Kubernetes, Docker or Mongo.

Software Engineer

Comet Global Consulting

01/2011 - 2017 Barcelona, Edinburgh

- I'm working as a Software engineer at Sky for the Payments and Assurance related functionalities.
- I designed, developed and supported REST and MQ services with a huge transaction load.
- I also advised and trained the new junior developers that joined the team.
- The team adopted Scrum and other agile methodologies and practices.
- Extreme programming techniques: Pair programming, continuous integration, unit testing and refactoring.
- Java development with J2EE architecture using Apache Maven, Spring framework, Spring security, Hibernate, MyBatis.
- Testing: TDD and Unit testing with Junit and Mockito. Integration testing with Fitnesse and Cucumber

EXPERIENCE

Software Developer

ABDE Consulting

📅 01/2009 - 10/2010 📍 Brussels

- I developed a Web application for the antifraud office of the European Commission (OLAF) in Brussels.
- That application allows organizations that belong to the member states of the EU to report fraud and irregularities.
- I worked as a Senior developer, designing new features and solving bugs and incidences.
- Some of the technologies used on the project were: Java, J2EE, WebLogic, Eclipse, Oracle, HTML, JavaScript.

Software Developer

TSD

📅 10/2006 - 09/2008 📍 Barcelona

- I worked for IBM as a senior developer in the maintenance and upgrade of the Financial Terminal of the Spanish Bank "La Caixa". It is a huge system receiving hundreds of thousands of transactions per day.
- The system was based on a set of different Java (SWT, WebSphere, JMS, etc) and Host technologies. I was focused on implementing new functionality on the middle layers (mainly J2EE technologies).
- The system was based on a set of different Java (SWT, WebSphere, JMS, etc) and Host technologies
- I was focused on implementing new functionality on the middle layers (mainly J2EE technologies).

Software Developer

Freelance

📅 06/2003 - 09/2006 📍 Barcelona & Helsinki

Freelance developer in several Java projects. The list of companies I worked for includes:

- Avis: Development of an integration platform to integrate Avis Rent a car web page functionality and partners (Airlines, Hotel companies...).
- Servidores.com: E-commerce site to order hosting services.
- GTECH: Development in Finland of a new platform for gambling online (the client was Veikkaus, the Finnish state lottery company).

Software Developer

Digital Avenue

📅 10/2001 - 06/2003 📍 Barcelona

- I worked for a Norwegian company developing games for wireless devices (handsets and PDAs). The development team was based in Barcelona and Oslo.
- We developed a platform for playing the games in different formats (custom protocols, wap, sms,...) using JEE and JME

🕒 History

EXPERIENCE

Software Developer

Viviance New Education

📅 12/1999 - 09/2001 📍 Barcelona

- I worked as a software engineer designing and developing an e-learning platform for the R&D department of the company.
- The whole platform was developed using several Java technologies such as AWT/Swing, RMI and JDBC.
- I worked within a team of people coming from different countries.

Junior Software Developer

EDS

📅 09/1998 - 11/1999 📍 Barcelona

- Development of an e-banking portal for the Spanish bank "la Caixa". Maintenance of the system using html, javascript and cgis.
